

Early Childhood Philosophy

Children at Bramfield Park Primary School are immersed in quality early childhood education programs that meet their physical, emotional, social, personal, spiritual and intellectual development. Each child is supported to learn in a safe, healthy and inclusive learning environment whereby the child's individuality is valued and promoted.

Early childhood learning environments at BPPS promote communication, problem solving, creativity and independent thinking through play based and hands on experiences.

Partnerships with families and the community are strongly valued and play an important role in each child's personal success and development. It is recognised that families are unique in terms of culture, beliefs and kinship systems which in turn enrich their child's daily experiences.

Our staff are committed to being at the forefront of Early Childhood educational research by regularly participating in ongoing professional education. Educators inspire children to become life-long learners and empower them to make choices to better their future.

Our school community is bound by the common understanding that we all "STRIVE TO ACHIEVE".
